Vibrant Land shifting (urban) boundaries in coastal North Carolina

5. Winter-landscape in transformation (year 2050) - active natural flows build the dune landscape and construct new shifting boundaries in the landscape.

6. Summer-landscape in transformation (year 2050) - increase in human occupation, a seasonal land use program unfolds.

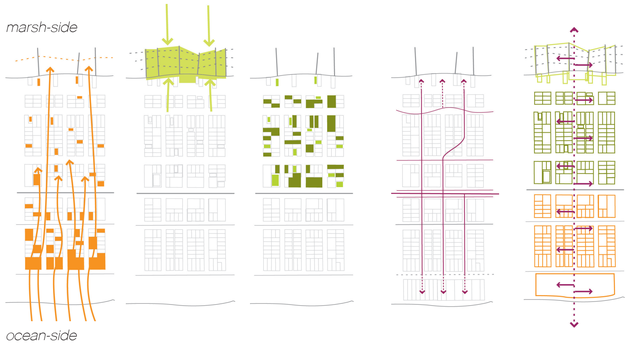
7. Spatial principles for re-building the lost boundaries.

I. Allocating natural processes to re-build the boundaries.

II. Creating robust island interior.

III. Flexible urban fabric.

IV. Enriching experience.



Stimulating sand-flows

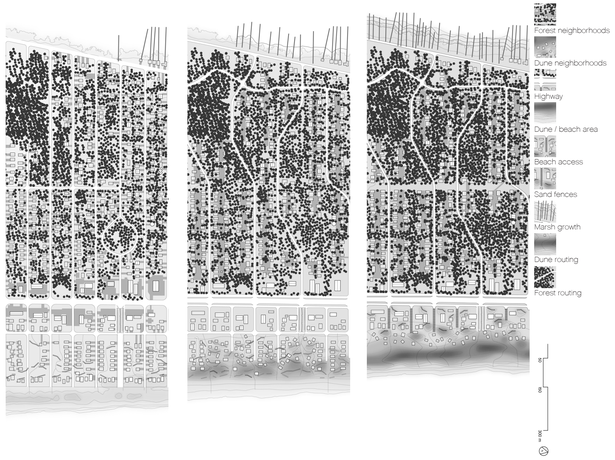
Stimulating marsh growth

Expanding the forest

More efficient road network

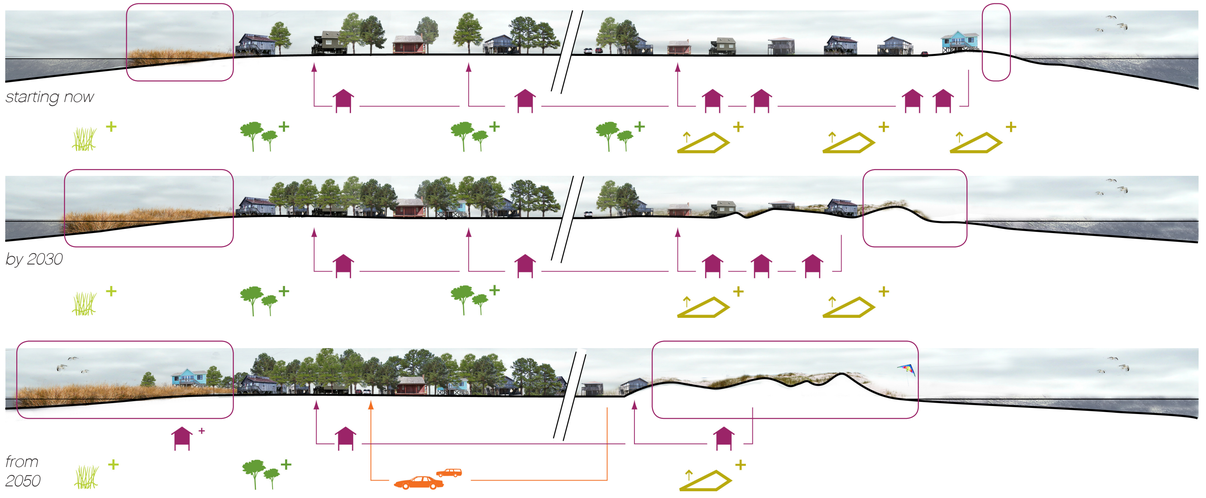
Distinguished landscape zones

8. Ever ongoing transformation in spatial organization (scale 1:10.000).



Starting now

2030

from 2050


9. Transformation in cross-sections, enlarging boundary areas.
